

## 01 / THE DECISION BRIEF

# Decision brief

## Molecule A

Three markets. Three different next steps.

### ANALYST SUMMARY / ILLUSTRATIVE

Prioritise the UK for counsel review. Keep Germany under timing review. Resolve the US source gap before making an investment decision.

#### • 01 / Prioritise

### United Kingdom

Take the mapped patent position to counsel for a full claim review.

#### • 02 / Timing

### Germany

Confirm the national extension before selecting a launch window.

#### • 03 / Verify

### United States

Reconcile the missing register entry before assessing access.

➞ **Evidence before investment.** Each conclusion leads to a source, a limitation and a named next action.

02 / MARKET ACCESS

# Market access assessment

## Molecule A / market position

Illustrative review windows, not launch clearance.

Fictional Molecule A · dates demonstrate the report format only

| Market               | Review window | What drives the read                                | Next step              |
|----------------------|---------------|-----------------------------------------------------|------------------------|
| United Kingdom<br>UK | • 2028        | Compound-patent expiry<br>Sample reference S-01     | Counsel claim review   |
| Germany<br>DE        | • 2030        | National extension<br>Sample reference S-02         | Confirm extension term |
| United States<br>US  | • Unresolved  | Incomplete register record<br>Sample reference S-03 | Close the evidence gap |

↳ **A missing record is an open question.** Every date carries its basis and the follow-up needed before it can inform a decision.

## 03 / EVIDENCE &amp; ACTIONS

# Evidence & next actions

## Molecule A / evidence register

Source, limitation and next action stay together.

### S-01 Compound-patent position UK

Example source: patent-family record and national register.

**Action:** Counsel confirms surviving claims and their relevance to the proposed product.

### S-02 National extension DE

Example source: national supplementary protection certificate register.

**Action:** Verify the extension term and any applicable paediatric extension.

### S-03 Register gap US

Example source: an incomplete drug-register entry.

**Action:** Retrieve the missing record and reconcile it with the patent estate.
